Stegosaurus

WHERE & WHEN

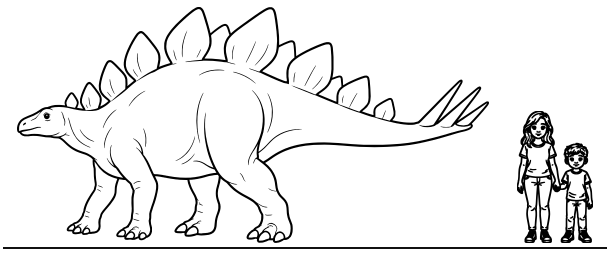

Fossils found: Western USA (Colorado, Wyoming, Utah)

TRIASSIC	JURASSIC	CRETACEOUS

Lived: About 152 to 145 million years ago.

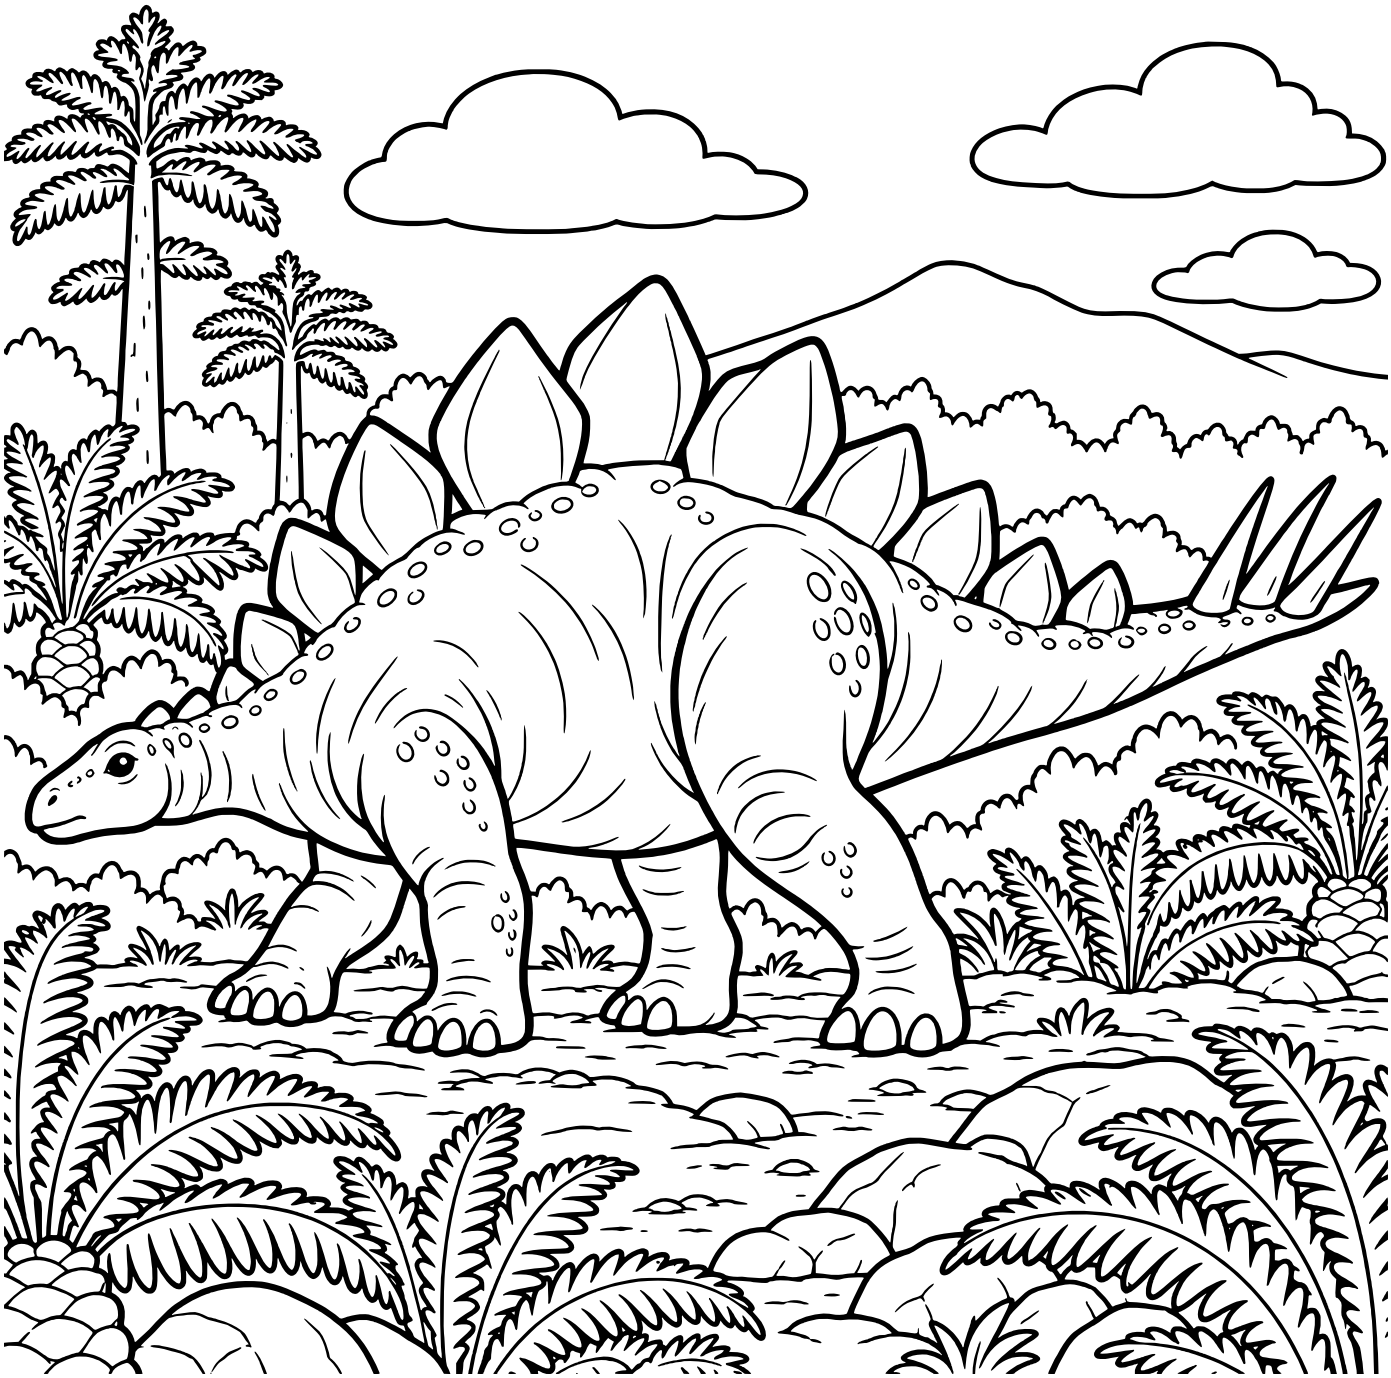

HOW BIG?

Stegosaurus about 9 ft 6 in (2.9 m) tall

Grown-up about 5 ft 4 in (1.63 m) · **Kid, age 7** about 4 ft (1.22 m)

It stood taller than a grown-up!

Stegosaurus

Say it: STEG-oh-SORE-us

Its tail had four sharp spikes. An old Allosaurus bone even has a hole that matches one!

☐ **Can you find the sharp spikes on its tail?**
